

# Ryan Hubbuck

## Front-End Developer

### Contact

(865) 804-0597  
rhubbuck@gmail.com  
ryanhubbuck.com  
github.com/rhubbuck

### Education

Roane State,  
Harriman, TN  
2015-2017  
4.0 GPA  
Summa Cumme laude

### Key Skills

Javascript  
HTML  
Typescript  
CSS/Sass  
React  
Angular  
Hydrogen  
Liquid  
Git  
Node  
Docker

### Objective

What began as a hobby, gradually grew into a passion. While working full-time in another field as a Physical Therapist Assistant, I began teaching myself programming three years ago. The more skills and languages I learn, the more I want to dive deeper into building things I enjoy and can be proud of. I am currently self-employed in freelance development.

### Experience

*2021-present*

Freelance Web Developer

Develop personal landing pages, e-commerce sites, and small-business pages for clients through the use of various back-end tools such as Firebase.

*2020 - present*

Physical Therapist Assistant • Tennessee Orthopedic Clinics

Development and implementation of treatment plans through exercise, manual interventions, and modalities. Serve as the contact point between patients and physicians to ensure safe and appropriate care.

### Projects

Lashes By Andrea

*Small-business landing page with scheduling and contact via Acuity and email-js.*

Underground Skate

*E-commerce site created in Hydrogen and connected to Shopify via API.*

Nama Sushi

*Restaurant landing page with dynamic menus and reservation submission.*

AllTrails

*CRUD application with user authentication and firebase for back-end. Feed feature and real-time post editing for connected user.*
